Rest and relaxation in the midst of the mountains

Bathing is already anchored in the name of the place: Rigi Kaltbad or "Cold Bath". The first bathing chapel was built as early as 1545, but unlike today, back then people bathed in cold water. The Rigi Minerabad & Spa on Rigi Kaltbad offers a heated outdoor pool with a unique view, a herbal steam bath and a Finnish herbal sauna in fantastic architecture by Mario Botta. The fascinating crystal bath is also a unique experience. In addition, a spa lounge with treatments and massages invites those seeking relaxation to linger.

The mineral bath draws its mineral-rich water from the healing spring of the Three Sisters Fountain and is sustainably heated with locally produced wood.
