EuroBirdwatch 2025 – Bird migration on the Rigi

Find out more about this natural spectacle, the bird species and their migration routes. Stop by the BirdLife Lucerne stand.

Experience the fascination of bird migration up close in the impressive landscape on the Rigi! We set up an observation and information stand at Alp Schild on the panoramic path between Kaltbad and Unterstetten. In addition to common species such as chaffinches, siskins, goldfinches, mistle thrushes and swallows, some birds of prey are sure to make an appearance. Find out about the special features of this natural spectacle as well as exciting facts about the individual species and their migration routes. Come along and observe migratory birds under expert guidance!
